

## This architectural section drawing illustrates the interior of the Basilica of San Vitale in Ravenna. The drawing shows a longitudinal section of the church, including the nave, aisles, and the apse. The nave is characterized by a series of arches supported by columns, with a central aisle and side aisles. The apse at the right end features a semi-circular plan with a central apse and side chapels. The drawing uses black lines for structural elements and grey shading for walls and floors. The overall layout is symmetrical, reflecting the basilica's design.

This architectural elevation drawing depicts a long, single-story building with a tiled roof. The facade is characterized by a series of windows: a row of larger, rectangular windows on the upper level and a row of smaller, square windows on the lower level. A central entrance is marked by a small balcony with a decorative railing. The building is set against a background of a grid of dashed lines, and a dark horizontal band at the bottom represents the ground level.
